

Planting Sunflower Seeds.

Step 1: Get your seeds

Seeds from a shop, some fruit (e.g. apple), your garden (ask permission!)- any are fine.

Step 2: Get some compost or some soil from the garden (ask permission first!).

Step 3: Put your compost in a pot

Step 4: Put one seed in each pot

Step 5: Press each seed into the soil

Like this:

Now press all the remaining seeds into the soil so they are covered.

Step 6: Write labels for your plants.

Step 7: Give your plants some water.

Step 8: Leave your seed somewhere sunny to grow.

Step 9: Check on your seeds every day to make sure the soil is moist but not soaking wet.
Water as required.

Seedlings should appear in 1-2 weeks
